SUMMARY

As a Full-Stack developer, my skill set covers a wide range of technologies, including ORM and CRM. My primary objective is to create and maintain responsive websites with a focus on delivering impeccable user experiences and ensuring robust Back-End security. My specialization lies in developing dynamic interfaces using clean and optimized code. I am also adept at employing cutting-edge development tools and adhering to advanced methodologies. My involvement in cross-functional teams is a pivotal factor that enables the creation of exceptional web applications.

EDUCATION

Undergraduate in Computer Science

Issyk-Kul State University named after K. Tynystanov

📅 2022 - Present   📍 Kyrgyzstan, Karakol

GPA
3.7 / 4.0

EXPERIENCE

Back-End Developer

WeDevX

📅 06/2023 - 08/2023   📍 Kyrgyzstan, Bishkek

WeDevX is an educational platform for those who dream of becoming future professionals in the IT field: from SDET and Full-Stack developers to product managers. I was responsible for the integration and functionality of AmoCRM.

- Refactoring someone else's code
- Rewrote the entire backend in ES6
- Developed my own individual backend for testing AmoCRM before implementing it into the main backend
- Integrated the AmoCRM system into the WeDevX backend
- I worked simultaneously with frontend developers to implement the Source of Traffic
- Great experience working with the team

Front-End Mentor

Secom & WeDevX

📅 10/2022 - Present   📍 Kyrgyzstan, Bishkek

From time to time, I assist Argen Duishobekov with guiding his students when he is busy.
And concurrently, I help my friends from WeDevX with job placements.

- Worked as a teacher in Front-End development
- Taught the React and NextJS frameworks
- I motivate aspiring professionals
- Frequent online presence on Discord
- I get a lot of energy when I share my experience with others

PROJECTS

AmoCRM

📅 07/2023 - Present   📍 Kyrgyzstan, Karakol
🔗 https://github.com/Elkhan2003/AmoCRM

Convenient tool for testing and interacting with CRM

- This project will enable successful integration of CRM into your backend
- With properly structured code it will be easy to develop for new developers

DevX Magazine

📅 01/2023 - 02/2023   📍 Kyrgyzstan, Karakol
🔗 https://devx911.netlify.app

Custom DevX Karakol development for employee attendance tracking. Developed in React Vite

- DevX Magazine is a magazine website with the ability to annotate people online
- By using Firebase, you can quickly copy the annotated users in one click on Copy Users and send reports via WhatsApp and other platforms
